

WOLFCOM Halo

Complete Body Camera Solution

Product Information
and Specifications

Complete Body Camera Eco System

The Halo Body Camera is a part of WOLFCOM's Complete Eco System. At the center of the Eco System is the WOLFCOM Evidence Management System (WEMS). WEMS is the heart that connects everything together.

WOLFCOM Halo Police Body Camera

CCI Number: I0219192

What is a CCI Number and Why is it Important?

The security and protection of Government own networks are of utmost importance in today's world. A CCI number (CJIS Certificate of Integration) is issued to companies whose body cameras and In-Car video systems have been screened to be free of Malware and Viruses and Integrate seamlessly to CJIS Compliant Evidence Management Software.

All WOLFCOM Police Body Cameras and In-Car Video Systems have CCI Numbers and have been fully screened and integrate with CJIS Compliant Evidence Management Software.

Designed with law enforcement officers in mind, the WOLFCOM Halo is an easy-to-use body camera with an ergonomic design, great battery life, and many features that police officers will use on a daily basis. Weighing only 4.6oz, Halo is an ultra-light device that features a whopping 10 to 12-hour battery, High Resolution Recording, Data Encryption Technology, Night-Vision Capability, a 360-degree Rotatable Clip, as well as Covert Recording and Visual, Sound and Vibration Indicators, and more!

WOLFCOM Halo Police Body Camera

Halo button on the front side of device activates the one-touch record feature and begins recording immediately.

At a press of a button, an officer can check the battery level. Blue LED's indicates how much battery life is left. Each bar represents 25% of remaining battery life.

Metal contact connection eliminates broken USB problems and ensures reliable charging and data transfer every time.

For maximum comfort, fit, and wearability, the durable metal clip rotates a full 360 degrees.

Vibrations, Sounds, Lights, Night Vision, Resolution, GPS, and more are completely configurable and can be enabled or disabled according to your department's policy. Password Protection & AES Encryption technology ensures all recorded data is safe, secure, and un-hackable.

WOLFCOM Evidence Management Software

WOLFCOM® Evidence Management Software Available on Cloud and On-Prem Solutions

The **WOLFCOM Evidence Management Solution** is a robust and flexible digital evidence management solution that can manage your video assets, photos, audio files, and documents. A user, with proper rights and privileges, will be able to tag, view, verify integrity of the asset, generate an audit trail report, and automatically purge the files based on the department's retention policies.

Have just one system to manage all your digital evidence

The WOLFCOM Evidence Management Solution is designed to manage all your department's digital evidence from body camera videos, digital pictures, in-car videos, surveillance camera videos, documents, audio recordings and other standard media files. This allows officers the ability to quickly find and view digital evidence. WOLFCOM knows that no two agencies are exactly alike. Our approach is to identify your unique challenges and develop a solution that addresses and solves problems for your department.

Universal Dashboard

Having a simple Widget Application Dashboard makes use of the software easy and familiar. Because it is a recognizable platform, there will be no learning curve for Admins and Users.

Video Redaction Feature

Blur faces and license plates with ease. Basic redaction is included free in every WEMS license. Redaction is done within the WEMS interface and is very simple to use. Or you can let our Artificial Intelligence redact your videos for you. Our Smart Redaction software is subscription based and will automatically detect faces and bodies. Audio Redaction is also available with Smart Redaction.

Finding a file is quick and easy

The intuitive user interface is officer-friendly and simple to use. Thumbnail file preview allows you to see thumbnails of picture or preview a video to make sure you have the correct file. Having all your information easily accessible in one place allows officers to spend more time fighting crime and less time wrestling with digital files. All metadata from a file is searchable by date, times, location, camera, officer, case numbers and much more. Evidence can be viewed from any department computer on the network.

Evidence is organized by Case Number

Law Enforcement activities are categorized by a Case Number or similar identifier; this allows the officers to organize all digital evidence that relates to each other by assigning it to a specific Case Number. So, when they pull up a case, they can view all the digital evidence affiliated with that case.

Define access levels to evidence

The WOLFCOM Evidence Management Solution allows each department to dictate users permissions. Groups and Organizations are configured to align with the policies of your department. This will all be customizable.

Always protect your chain of custody

All activity is logged by the system. An audit trail report displays who, what, when and where files have been accessed. With this system, you will not lose a case due to a break in chain of custody.

File Authentication

Once a file is ingested into the WOLFCOM Evidence Management Solution, the files will be stamped with a SHA2 256-bit Hash. This ensures the files are authentic and admissible in court.

Configure file retention periods

Only store critical information and automatically delete evidence once expired. The WOLFCOM Evidence Management Solution allows evidence to be purged from the system based upon configured retention periods, or by an authorized user. Schedule retention period by evidence type or by crime type.

GPS GeoTagging Map can be viewed on software

With GPS enabled body cameras, GPS coordinates are stamped onto every video and picture file, frame by frame and picture by picture. When reviewing videos with our WEMS, you will be able to see the route of the video simultaneously on the map next to the video and as the video moves, so does the dot on the map. This is valuable when reviewing video of a foot or car chase as you'll be able to see the exact route taken as footage of the chase unfolds before you.

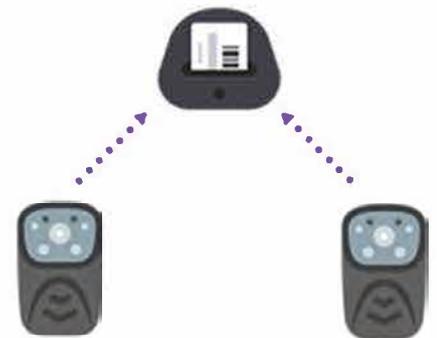

New Desk Sergeant Authorization Camera Control System

Contact us for Price

Share body cameras among your officers

With Desk Sergeant ACCS (Authorization Camera Control System), police officers can now easily share the same body camera or in-car systems. With our Desk Sergeant System, there's no longer a need for a supervisor to manually de-register a camera from one officer and re-register it to another. With Desk Sergeant, Everything is Automatic! Officers can check in and check out cameras with ease. If an officer checks out a camera that's broken, no problem! He can easily check out another camera in a matter of seconds.

- **Easily share cameras among different shifts**
- **Saves Time and Money- Save hundreds of man-hours per year**
- **Keeps Officers on the field instead of at his desk waiting for his camera to be repaired**
- **Check in-check out activity is recorded in audit trails**

Complete On-Premises Body Camera Solution

1. Your Officers start their day with our Body Cameras and In-Car cameras

2. At the end of their shift, Officers plug our body cameras into our Smart Docking Stations. It detects the cameras and downloads all the files to the storage solution

3. The WOLFCOM Evidence Management Software (WEMS) manages and encrypts all digital evidence

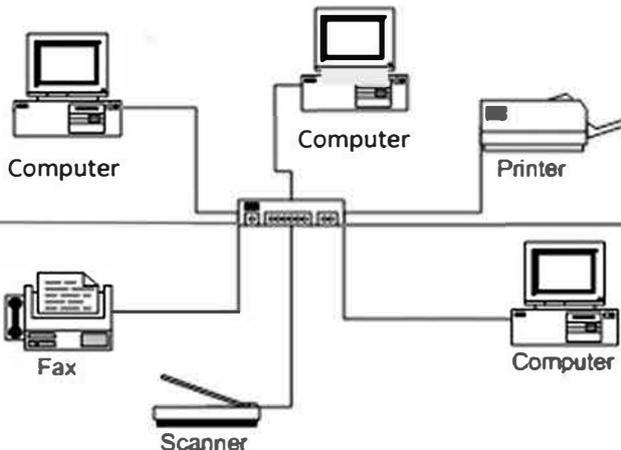

5. Open a browser and access WEMS from any computer connected to the network. Officers can access files according to their roles and permissions

4. The WOLFCOM Storage Solution is connected to your network

Complete Cloud Body Camera Solution

Our CJIS Compliant Cloud Storage is available for Law Enforcement & Government Agencies that need a simple and secure method to upload and store body camera video footage as well as other digital assets. Our servers are 100% secure and abide by the **Criminal Justice Information Services** requirements. Save time, resources, and space.

No overage charges – Pool your storage – Add storage as needed

You control your cost

1. Your Officers start their day with our Body Cameras and In-Car Cameras

2. At the end of their shift, Officers dock our body cameras into our Smart Docking Stations. It detects the cameras and uploads all the files to our CJIS cloud storage

No Overages: Our system will alert you when your storage is at 85% capacity. That way you can adjust your Retention Policies to custom fit your agency. It's like having your own private server in the cloud. You "Set & Control" your usage and your cost. Your bill will never be more than what you expect it to be.

Pool your storage capacity together: All of your officers can pool together their storage capacity. For example, if you purchase our Pro Package (600 GB per officer) for 10 officers, your officers can pool their allotted storage together and share 6000 GB (6TB) of storage. This method is extremely beneficial if an officer takes sick leave. His/her cloud storage allotment will never go to waste!

Add storage as your needs grow: You can add additional storage as your needs grow. Need to add another Terabyte of storage? No Problem. Each additional Terabyte of storage is just \$720 a year. Best of all, your officers will be able to share and pool all of your storage capacity together!

WOLFCOM Cloud Storage Packages

No overage charges - No hidden fees - You control your cost
Set your own storage capacity - Pool your storage capacity together

Basic

- ✓ 300GB per officer
- ✓ No contract

* Based on Qualifying Retention Policies

** First body camera is issued in the beginning of contract and second is issued 2.5 years into the contract

Products

Halo Body Camera

With over 11 hours of battery life, the Halo is WOLFCOM's newest body camera. Waterproof IP67 rating, battery life indicator, configurable night vision, built-in Wi-Fi and GPS gives your officers the latest innovation in police body camera technology.

Halo Car Mount

The WOLFCOM Halo Body Camera can be turned into an affordable in-car camera with this easy-to-use suction mount. Simply attach it to the camera and mount it on the vehicle windshield.

Halo Epaulette Clip

This shoulder clip allows you to mount your Halo Police Body Camera to your shoulder epaulet.

Halo Pin Lock Clip

The Pin Lock Clip is the most secure body camera clip in the market! It can be mounted anywhere on the uniform and allows officers to easily attach and detach the Halo Body Camera using only one hand.

Halo Magnet Mount

The Magnetic Mount allows you to mount your Halo anywhere on your uniform in a matter of seconds! The magnets are extremely strong, making it the most versatile mount in the police body camera industry!

Products

Halo Single Docking Port

The Single Docking Port is able to charge and transfer data from one Halo body camera. It uses a metal contact connection to connect to the Halo Body Camera, eliminating broken USB problems and ensuring reliable charging and data transfer every time.

Halo 8-Slot Docking Port

The Halo 8-Slot Docking Port can be used to charge and transfer data from up to 8 Halo Body Cameras at the same time. It uses a metal contact connection to connect to the Halo Body Cameras, eliminating broken USB problems and ensuring reliable charging and data transfer every time.

8-Man X2 Smart Upload Docking Station

Our 8-Man Smart Upload Docking Station connects to a network with our WOLFCOM Evidence Management Software (WEMS) and automatically extracts files once cameras are docked. One Station can accommodate up to 8 cameras and comes with WEMS Extractor pre-installed.

16-Man X2 Smart Upload Docking Station

Our 16-Man Smart Upload Docking Station connects to a network with our WOLFCOM Evidence Management Software (WEMS) and automatically extracts files once cameras are docked. One Station can accommodate up to 16 cameras and comes with WEMS Extractor pre-installed.

2-Year Extended Warranty

Extend your Halo Body Camera warranty for a total of 2 years. When your camera gets old, send it back within 2 years for a free, brand new replacement.

Products

MDT Mobile Client Software

With the WOLFCOM MDT Mobile Client Software, officers can now view, playback, fast forward, rewind, pause, tag and Classify video, photo and audio files in the field without having to wait until they return to the station. The Officer can view, playback, fast forward, rewind and pause a video.

WOLFCOM® Evidence Management Software Available on Cloud and On-Prem Solutions

WEMS On Premises Storage and Management

The **WOLFCOM Evidence Management Solution** is a completely scalable system able to adapt with ever evolving technologies.

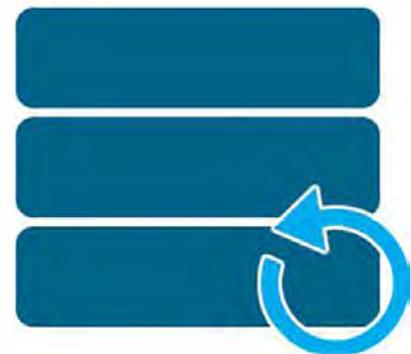

Starting at 8TB, our WEMS Storage Solution complies with IACP and CJIS requirements for Storage, Encryption, access, and management of digital data. Important features such as Permissions, Retention and Redaction are available. You can also connect to your network and access WEMS through an internet browser from anywhere in your department.

Includes: Storage Tower and pre-installed WEMS.

Backup & Recovery

In the event of a disaster, our backup and recovery service will have all of your files back in no time. Data backup and disaster recovery are two functionally different components and are important in any IT security strategy. Data backup is the act of storing a copy of files or data to a separate storage location. In the event of a disaster, those files can be restored. Disaster recovery is the act of restoring those files and data for you. In the event something happens, we'll be able to recover and restore everything back to normal.
