## Features

- Android Operational System
- Remote View capable via 4G
- High Definition 1440p Video
- 32 GB Non-Removeable Memory
- Up to 15 Hours of Battery Life
- Replaceable Battery
- Pre-Record
- Automatic Night Vision
- Covert Mode
- GPS Location Playback
- Public Awareness Light
- Emergency Identification Light
- Facial Recognition
- Commander Notation System
- Waterproof IP68
- 4G/LTE
- Wi-Fi
- Bluetooth

## Commander Body Camera

[Watch Presentation Video](#)

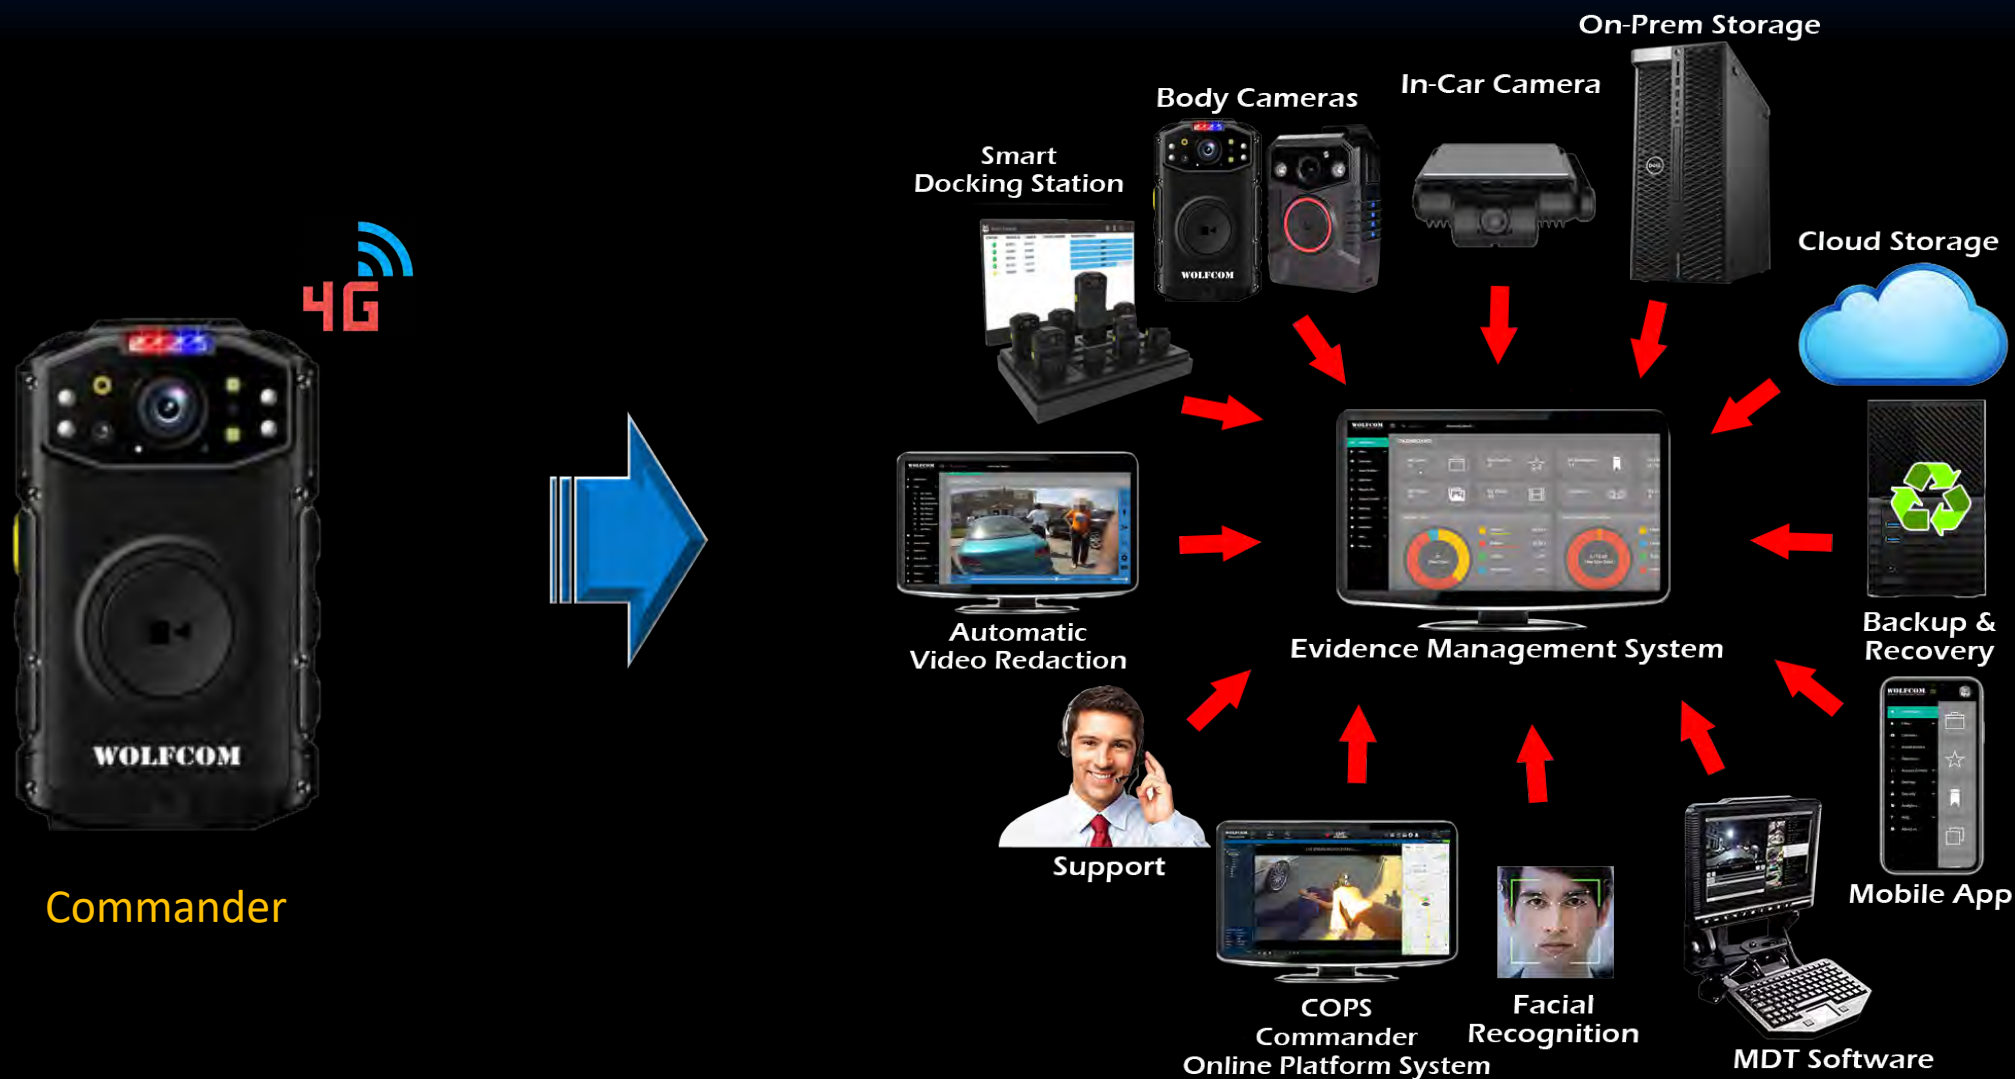

The **Commander by WOLFCOM®** is a Smart Android Body Camera System designed to work with **COPS (Commander Online Platform System)**. Made specifically for Law Enforcement, Military, and Commercial Applications, Commander takes body camera technology to the next level by offering IOT connectivity through 4G/LTE, WiFi, Bluetooth, NFC, and GPS providing multiple options, such as Audio/Video Recording, SOS Emergency Connect, Wireless Uploads, GPS Real-time Location Tracking, Live Streaming and POC PTT (Push To Talk) communications by 4G/LTE Cellular. Later add-ons will include Facial Recognition power by Artificial Intelligence.

## Commander is a Multi-Functional Multi-Purpose Smart Device

**WOLFCOM®**

**15 Hour Battery Life**  
**Waterproof IP68 Rating**

## COPS Commander Online Platform System Livestream-Record-Communicate-Track

Get COPS, and you will be able to watch live video from any Commander camera when your officers are out in the field. In the event of an Emergency, Officers can activate our **Emergency SOS Connect** Feature. With a push of a button, the Officers Commander camera will activate a distress call and immediately send live video and GPS coordinates direct to Dispatch. Each Commander Camera can be tracked in real time on a map. Using COPS, one camera or a group of cameras can Livestream back to Dispatch simultaneously. Communicate with each officer or a group of Officers with the PTT (Push To Talk) Button.

4G/LTE

COPS

## Commander Online Platform System

- See Live Video and GPS Coordinates of every Officer.
- PTT (Push To Talk) Voice communication between body cameras.
- Send SMS Text Message from camera to camera.
- Emergency SOS Alert to Dispatch with GPS and Video.
- Record Streaming Video to PC

COPS

Wi-Fi 4G/LTE GPS

## WOLFCOM COMMAND CENTER

Manage-Monitor-Command-Control

SOS Button

PTT Button

Once Touch Record

WOLFCOM®

### Perfect for companies that need to:

- Track and Communicate with Employees.
- Manage several Groups and Fleets.
- See Live video stream from multiple users.
- Record Audio & Video for liability purposes.

Pressing the SOS Button will send Live Video and GPS Coordinates to Dispatch

- Medics on a battlefield treating a severe injury can press an SOS button on the camera and send live video of the injury to doctors at base who can then assess the injury and provide the medic with life-saving instructions.
- Officers in a Life or Death situation can concentrate on staying alive. One push of the button will send video, audio, and GPS Location to Dispatch.

## Facial Recognition

With Facial Recognition technology, warfighters will have a body camera that can analyze the face of everyone they encounter and provide an alert to the user as well as the Command center if there is a match. Our solution provides the user with a host of abilities that can help save lives, make better and faster decisions, and provide necessary information that will allow decision-makers to make critical decisions if a mission goes awry.

## COPS Commander Online Platform System

Using our Commander Online Platform, one camera or a fleet of cameras can be detected at any time. Watch live video footage of any Commander camera when your officers are out in the field. The GPS location of each WOLFCOM® Commander Body camera can be tracked in real time on a map. With our SOS Live Stream connect feature, Officers can relay live video footage including their GPS location to the station in the event of an emergency. **Multiple dispatchers can log on at the same time.**

## Dispatch License

Each Dispatcher will need a license to log-in to the Commander Platform and monitor and communicate with each officer that is wearing a Commander body camera.

## Live Streaming Connection Plan

With our Connection Plan, you'll be able to:

- Track and Communicate with Agents via Push to Talk and Text messaging.
- Track the GPS location of all your Agents in Real-time.
- Manage several Groups and Fleets.
- See Live video stream from multiple Agents.
- Record Audio & Video for liability purposes

## Commander Notation System

Our (CNS) Commander Notation System allow Officers to playback and review video according to their rights and permissions. Officers can tag, classify, and enter both voice and text notations to videos and photos taken with Commander. When the Commander body camera is docked at the end of a shift, the classifications and notations are synced with WEMS.

Agencies can save thousands of dollars annually in overtime pay by having officers do the work on the field instead of later at the station.

- Data can be synced to WEMS Cloud
- Data can be synced to WEMS On-Premises
- Data can be synced over VPN

Tag, Classify, Notate, Sync

Commander will automatically start recording when an Officer's weapon is unholstered.

Works with both a Handgun or Electrical Weapon to automatically trigger the Commander via Bluetooth to activate recording when an Officer draws his weapon.

## How our System Works.

Everything is Secure and Automatic

Commander

Officers Use our Body Cameras to Record throughout their day.

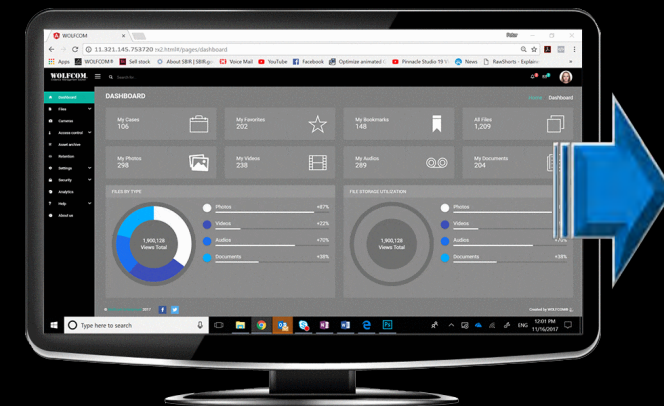

Notation System

While in the field, Officers can Playback and Review Recorded files. They can Tag & Classify each Video and enter Notations by voice or text..

Docking Station

At the end of their shift, Officers place the cameras into the docking station. Files are then automatically uploaded into WEMS. A status bar displays the upload status of each camera. When Transfer is complete, the files on the camera are deleted and the docking station proceeds to charge the cameras for the next days' use.

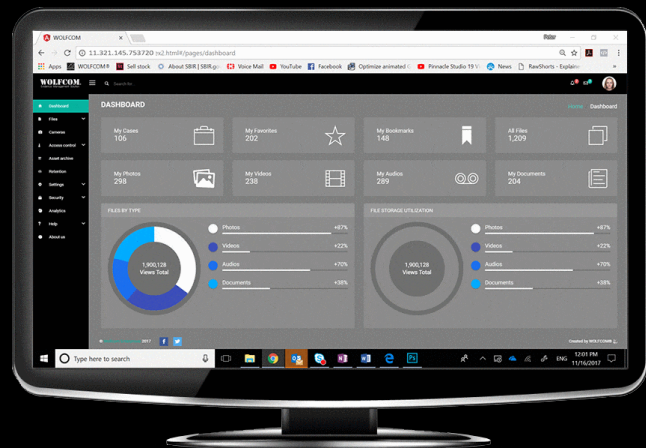

WEMS

All files are uploaded into the officer's evidence folders and are then Encrypted using Sha-256 IACP Standards.

You can choose to store your files in the Cloud or On-Premises.

After files from the cameras are uploaded and managed through WEMS, they are then stored in either the Cloud or an On-Premises Server.

Cloud Storage

On-Prem Storage

## Advantages of Cloud Storage

- Headache free. No need for IT staff
- We'll take care of everything
- Access WEMS from anywhere in the world
- Easily Share Files with District Attorney
- All files are automatically backed up
- Access WEMS on Your Smart Phone
- Upload Files from your Phone
- Pool your storage together
- No Overages

## Advantages of On-Premises Storage

- You own the system
- No Monthly Storage Fees
- Immediate Access to your files.
- Access WEMS from any PC on your network
- Easily Share Files with Anyone on your VPN
- Free Updates & Maintenance
- Free Technical Support

Cloud Storage is Simple and Convenient.
